Questions:

- What are your special abilities?
- Do these special abilities give you joy/satisfaction?
- Are they being utilized in your career?
- How could these talents enhance your job choices?

3 Steps to Long-Term Career Planning:

1. Determine your career vision.
2. What actions support achievement of Long-Term goals?
3. Create Goal Setting Plan.

Goal Setting

Step 1: Determine your career vision.

- What your dream job?
- How do my talents support my dream job?
- What are the specifics: what, where, who, when?
- What do I want to be known for in the workplace?

Goal Setting

Step 2: Determine the actions that are required to achieve the Long-Term goals (aka: Short-Term Goals).

- What are my immediate employment needs? How can they support my long-term career goals?
- What are the requirements of this career? Do I need additional education and/or training?
- How does this career goal affect my finances?
- What is a realistic time frame?

Goal Setting

Step 3: Document your plan.
