

HOUSTON **NW** CHURCH

Employment Assistance Ministry: Employment Opportunity

BEMA Network Engineer – North Houston

Looking for an opportunity to use your 5+ years of Network Engineering in a team collaborative environment where your input to solutions is encouraged? Are you stuck in a position where you're just under challenged? Then you should consider joining **BEMA** where opportunities for technical and personal growth are numerous.

BEMA Information Technologies is a highly recognized provider of IT services to churches, schools and medium-sized businesses. We are 17 years old, have grown without a sales force and do not advertise. Our consistent growth comes from hiring Network Engineers who provide excellent service thereby turning our clients into salespeople.

We are a bit different....

- We care about you, your family, and your career development
- We don't want you working overtime
- We strive to over communicate rather than under
- We serve many clients, but work hard to keep you working on your side of town

You will:

- Brainstorm with 40+ engineers
- Be exposed to many different environments
- Grow your technical skill set
- Receive career coaching

Preferred candidates should have:

- Hands on IT infrastructure experience
- Ability to communicate well with non-technical users
- Reliable transportation
- Desire to provide excellent customer service

For a complete list of requirements for this position, see the Network Engineer job description on the **BEMA** website by clicking [here](#).

Most of the clients you serve will be in the North Houston area including, but not limited to, the Northern Houston area, The Woodlands, Spring, and Conroe.

Does this sound like the future you're looking for? Send your resume now to recruiting@bemaservices.com
